

# BEST FRIEND TREATS

A lot of research goes into giving your friend all he/she needs to enjoy every single day. Here is some information about your dog and the product we provide.

## What

what are you giving your best friend by buying from us?

### CARBS

Best friend treats is made with carbohydrates that are easily digestible by your dog, this will allow its body to absorb as much nurture as possible!

### FATTY ACIDS

Fatty acids are very important for your dogs skin and coat, they also provide your dog with energy.

### CALCIUM

This product is also high on calcium which helps with the foundation of bones and teeth.

### PROTEIN

We provide your best friend with high quality protein containing all the aminoacids he/she needs. This will also be a good source of energy .

## How

How is this helping your friend?

## Lets Compare!

Lets compare what we are offering with the recommended necessary daily intake for dogs.

An adult dog's daily balanced diet can and should contain up to 50% carbohydrates by weight, 2.5%-4.5% fiber ca. 5.5% fat and 10% protein.

50%  
CARBS

10%  
PROTEIN

5.5%  
FAT

2.5-4.5%  
FIBER

## How Much?

Should you give your dog depending on life stage.

### PUPPIES

Over time, puppies may consume twice as many calories per pound of body weight. This would be approx 500g of Best Friend Treats daily.

### ADULTS

Adults don't require as much as puppies, but still need certain amount of energy to sustain their daily activities. They would require 250 g a day.

### LACTATING DOGS

The mother needs for calories increases with the number of puppies. Lets say the dog has 5 puppies. It would need at least 700g. Adding 100g for each extra puppie.
